Why XonTel

- With our advanced experience in the world of telecommunications technology.
- we are looking forward to being one of the largest providers of this technology in the upcoming years.

Who are we?

- XonTel Technology was established in the State of Kuwait in 2004, where many developers and communications engineers specializing in VoIP technology work to develop the latest services and advanced solutions in this field.

Our Works:

- XonTel is the largest Arab brand that invests in the development and manufacture of various communication products that work with IP technology, such as IP PBXs, IP phones, IP video intercoms, Internet Access Points, Access Point Controller and many other services that help you connect and build an integrated communication network to serve all Governmental and service sectors, Business sector, and home users.
- In addition to the calls management systems (Call Center Systems) with many advantages to serve business sectors of different sizes.
- XonTel Technology – State of Kuwait is the official developer of all "XonTel" products.

Our Goals:

- XonTel seeks, with its advanced experience in the world of telecom technology, to become one of the biggest providers of this technology in the following years.
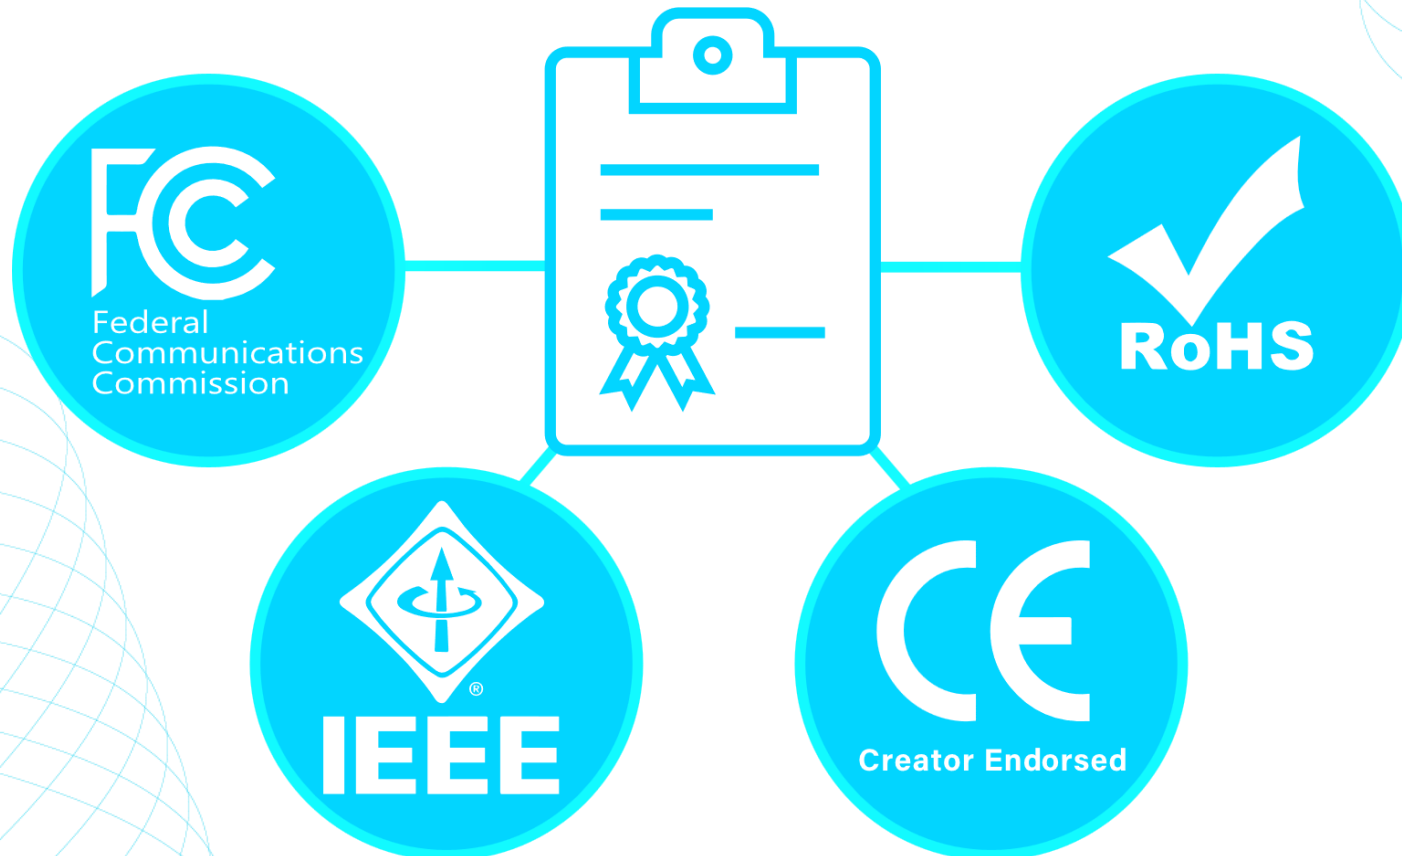

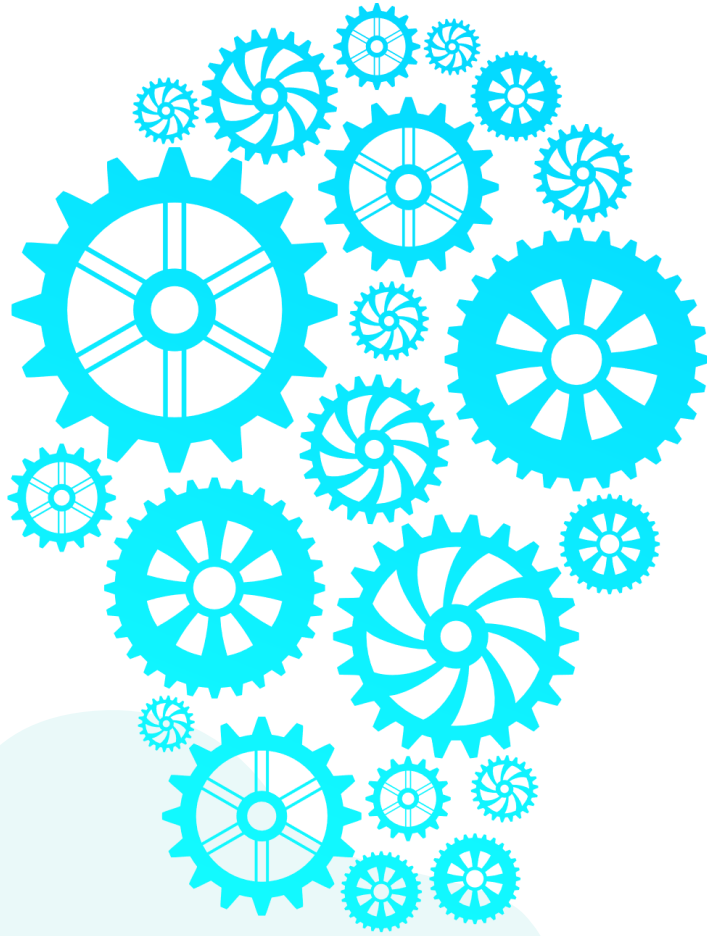

Our Philosophy:

- Satisfying the customer and providing the best services after selling is one of our main goals, which we are hoping to achieve, and to do this we release and present our products and services in general, according to the highest quality standards globally.
- We seek to expand depending on chosen marketing plans and targeted coverage, to guarantee to be in the market while keeping on XonTel reputation.
- XonTel gives the chance to highly effective and hopeful employees, as teamwork and highly organized communities pushes a lot of youths to dream of joining our team, to gain these technical and organizing experiences.
- The high commitment to projects and the product delivery is one of the most important features that XonTel continuously cares about.
